Disclaimer

'Typical Analysis' is the average (by weight) calculated from the quantities of ingredients used to manufacture a batch and/or blend a load. As this is an average analysis, samples from batches or loads may vary. Bulk density can vary by up to 10 per cent or more. This brochure is offered as a guide only and product analysis is correct at the time of printing. Product analysis may vary and customers should confirm analysis with their CSBP account manager or sales agent at time of purchase.
